PrimeCare Contracts with PAETEC to Provide Enhanced Internet Services

FOR IMMEDIATE RELEASE

Newport News, VA - June 30, 2009 - PrimeCare Systems, Inc., (OTCBB:PCYS) announced today that it has selected PAETEC as its new supplier of Internet connectivity and management services. Under the agreement, PAETEC provides redundant Internet connectivity, router management and domain name services that improve connectivity, data transfer speeds, and reliability for PrimeCare's customers worldwide.

The transfer to PAETEC-supplied connectivity began several weeks ago, and was accomplished in incremental steps until the final switchover, which was completed in mid-June. During that process, there was little to no interruption in services to PrimeCare's domestic or international clients. According to W. Jördan Fitzhugh, COO of PrimeCare Systems, Inc., "The arrangement with PAETEC has enabled PrimeCare to reduce the complexity of its network operations while increasing reliability, and providing the highest level of support to our clients. We are very pleased with the support PAETEC has provided, both during the planning phase and the operational phase of the changeover." "The nature of PrimeCare's business requires a data provider with a reliable, secure network along with exceptional service," said Jeff Williams, PAETEC regional director of sales. "We're honored that PrimeCare has selected PAETEC as the provider for these services."

About PrimeCare Systems, Inc., and the Version Nine System

PrimeCare's primary product, *The Version Nine System*, is user-friendly interactive software that creates an electronic patient record. The Version Nine System is centered around an authoritative and comprehensive knowledge bank of approximately 285 symptom and problem-oriented patient history questionnaires, collectively containing over 100,000 chief complaint and disease state questions. The Version Nine System is an Internet-based product that requires of the user only a computer running any current version of Windows, and an Internet connection. Installation requires only a few moments, and no sensitive data is permanently stored on client machines. All patient information is securely stored in PrimeCare Systems, Inc.'s secure data center, available to authorized users twenty-four hours a day, seven days a week, from any location with Internet access.
